Subject: Glyphosate NSRL
Date: Monday, June 05, 2017 9:32:16 AM

Dear Mrs. Barajas-Ochoa,

I sincerely and urgently request that the Prop 65 NSRL (No Significant Risk Level) for glyphosate must be a validly arrived at NSRL, per CA regulations, substantially lower than the proposed 1100 micrograms per day, in order for this Safe Harbor to actually be safe to Californians. Until a comprehensive independent study is done, showing real life exposure levels, regulatory authorities should use a NSRL of well below 0.0001 micrograms/day, (Thongprakaisang et al., 2013), the level where breast cancer has been detected, in keeping with The Precautionary Principle.

Please consider my request.

Warmly,
Christine Burke
Ventura, CA
